Professional Profile

Enthusiastic about innovation and software development, with more than 2 years of experience as a developer, working with web and desktop applications, using different technologies and programming languages such as JavaScript, C# and others, working both in the back end and in the front end. I have helped Startups and companies to develop new or existing business models, using technologies, empathizing with their pain points and solving them with a holistic vision using frameworks such as Lean Startup, Design Thinking and Agile.

Development Experience

C# Consultant
LOCUS SYSTEMS EL SALVADOR , San Salvador / 2020 - 2021

- Design and development of strategy for the administration system.
- Development of a desktop platform in C# with the previously planned strategy.

FULLSTACK DEVELOPER
